MINIMUS BAREFOOT

footwear collection

Minimus barefoot shoes meet all the key criteria to provide an explicit barefoot experience for big and small. They are:

NEXT BEST
THING
TO BARE
FEET

FLAT

with zero drop without cushioning. A flat sole provides the best foundation for a natural, upright posture and helps prevent knee, hip and back pain.

WIDE

for a natural foot shape, giving feet the much-needed freedom by allowing the toes to spread in their natural position.

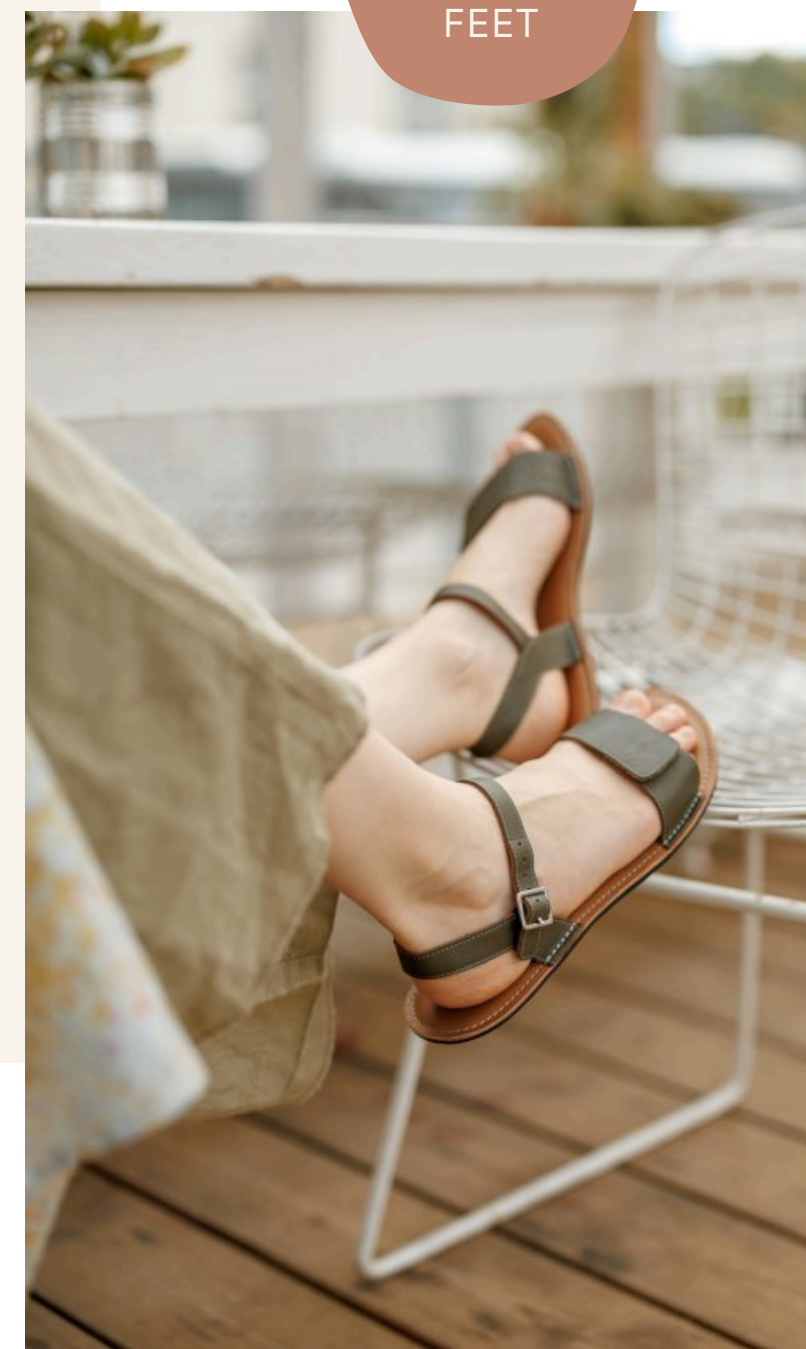

THIN & FLEXIBLE

with just 2-4 mm outsole. Minimus sandals, shoes and boots allow to feel the ground beneath feet and connect with the environment in a natural way.

WHAT IS

barefoot footwear?

Barefoot shoes are designed to be wide, thin, flat, and flexible, providing the sensation of walking barefoot. They're created to naturally strengthen your feet and ankles by allowing them to sense and adapt to changes in terrain. This not only improves your overall health, but also contributes to the wellbeing of your nervous system.

Little Woodpecker — our new first-walker sneakers, specially designed for the spring-summer season. Built with the same soft and flexible leather outsole as our beloved Skylark 2, these sneakers ensure comfort and freedom of movement for little feet taking their first steps. The thin rubber base promotes natural movement, letting children explore the world around them with ease.

Crafted from genuine leather, Little Woodpecker sneakers are treated with a water-repellent finish, making them a perfect choice for sunny spring days and cloudy summer outings. With a wider toe-box that provides extra space for growing toes to spread naturally, they offer the optimal fit for healthy foot development. Secured with two adjustable velcro straps, they guarantee a snug and comfortable fit, even during the most active playtimes.

These sneakers are a smaller version of our new Woodpecker model, ensuring the same great design for younger and older kids alike.
